

Writers Engine 1.0 Quick Start

CopyNope by Mark Reach 2026. Freely have you received, so freely give; however, if you would like to thank me: Buy Me a Coffee! <https://buymeacoffee.com/markreach>

Writers Engine 1.0 is a dual-panel text environment built for focus and speed. The interface features two independent editors that allow you to manage multiple documents or draft and compare content side-by-side.

Interface Basics

- **Dual Panels:** Each side operates independently. Anything you type is automatically saved to your browser's local storage.
- **The Menu:** Click the three vertical dots (⋮) in the top-right corner of either panel to reveal your toolset.
- **Word Count:** A live counter sits at the top of the menu, updating as you type.

Managing Documents

- **Quick Save:** Select "Save Quick" to download the current panel's content as a .txt file.
- **Save As:** Use this to name your file specifically before downloading.
- **Open File:** Use the "Open File" option to import existing .txt files into the editor.

Customization & Tools

- **Themes:** Cycle through display modes (Black/Phosphor, White/Black, Black/White, and Black/Amber) via the menu. Your preference persists across sessions.
- **Read Aloud:** Select this to have your text read back to you. The system processes the text in chunks for natural pacing.

Just a heads-up, this is a local-first tool. Since it runs entirely in your browser, remember to use the save buttons if you want to keep permanent copies of your work off the machine.
